3 The Swollen Optic Disc in Childhood

Introduction................................................................. 97

Papilledema................................................................. 98

Idiopathic Intracranial Hypertension (IIH) in Children........ 101
Optic Disc Swelling Secondary to Neurological Disease........ 110
Optic Disc Swelling Secondary to Systemic Disease............. 111
Uveitis........................................................................ 120

Posttraumatic Optic Disc Swelling................................. 121

Intrinsic Optic Disc Tumors........................................... 122

Optic Disc Hemangioma................................................ 122
Tuberous Sclerosis......................................................... 122
Optic Disc Glioma........................................................ 123
Combined Hamartoma of the Retina and RPE..................... 123

Retrobulbar Tumors....................................................... 123

Optic Neuritis in Children............................................. 124

History and Physical Examination................................. 124
Postinfectious Optic Neuritis......................................... 124
Acute Disseminated Encephalomyelitis............................. 124
MS and Pediatric Optic Neuritis..................................... 125
Devic Disease (Neuromyelitis Optica)............................... 126

Prognosis and Treatment.............................................. 127
Course of Visual Loss and Visual Recovery....................... 127

Systemic Prognosis....................................................... 128
Systemic Evaluation of Pediatric Optic Neuritis................ 128
Treatment...................................................................... 129
Leber Idiopathic Stellate Neuroretinitis......................... 129

Ischemic Optic Neuropathy........................................... 132

Autoimmune Optic Neuropathy..................................... 133

Pseudopapilledema....................................................... 133

Optic Disc Drusen....................................................... 133

Ocular Disorders Associated with Pseudopapilledema........ 140

Systemic Disorders Associated with Pseudopapilledema..... 140

References................................................................... 142

4 Optic Atrophy in Children.......................................... 155

Introduction................................................................ 155

Epidemiology............................................................... 156

Optic Atrophy Associated with Retinal Disease................ 159
Congenital Optic Atrophy Vs. Hypoplasia......................... 160

Causes of Optic Atrophy in Children.............................. 161

Compressive/Infiltrative Intracranial Lesions................... 161
Noncompressive Causes of Optic Atrophy in Children with Brain Tumors 168

Hereditary Optic Atrophy.............................................. 169
## 5 Transient, Unexplained, and Psychogenic Visual Loss in Children

### Introduction

Neuro-Ophthalmologic Manifestations of Neurodegenerative Disease in Childhood

9 Torticollis and Head Oscillations

Torticollis

Ocular Torticollis
Head Tilts
Head Turns
Vertical Head Positions
Refractive Causes of Torticollis
Neuromuscular Causes of Torticollis
Systemic Causes of Torticollis

Head Oscillations

Head Nodding with Nystagmus
Head Nodding without Nystagmus
Visual Disorders
Otolological Abnormalities
Systemic Disorders

10 Neuro-Ophthalmologic Manifestations of Neurodegenerative Disease in Childhood

Introduction

Neuronal Disease
Neuronal Ceroid Lipofuscinosis
Lysoosomal Diseases
Gangliosidoses
Mucopolysaccharidoses
Subacute Sclerosing Panencephalitis
White Matter Disorders
Metachromatic Leukodystrophy
Canavan Disease (Spongy Degeneration of Cerebral White Matter)
Krabbe Disease
Pelizaeus–Merzbacher Disease
Cockayne Syndrome
Alexander Disease
Sjögren–Larsson Syndrome
Cerebrotendinous Xanthomatosis
Peroxisomal Disorders
Mitochondria Encephalomyelopathies
Arninoacidopathies and Other Biochemical Defects
Congenital Disorders of Glycosylation
The Phakomatoses

11 Neuro-Ophthalmologic Manifestations of Systemic and Intracranial Disease

Introduction
The Phakomatoses
Neurofibromatosis (NF1)
Neurofibromatosis 2 (NF2)
Tuberous Sclerosis
Sturge–Weber Syndrome
von Hippel–Lindau Disease
Ataxia Telangiectasia
Linear Nevus Sebaceous Syndrome
Klippel–Trenauney–Weber Syndrome
Brain Tumors
Suprasellar Tumors
Arachnoid Cysts
Cavernous Sinus Lesions
Hemispheric Tumors
Posterior Fossa Tumors
Brainstem Tumors
Tumors of the Pineal Region
Meningiomas
Epidermoids and Dermoids
Gliomatosis Cerebi
Metastasis
Complications of Treatment of Intracranial Tumors in Children
Hydrocephalus
Hydrocephalus due to CSF Overproduction
Noncommunicating Hydrocephalus
Communicating Hydrocephalus
Common Causes of Hydrocephalus in Children
Clinical Features of Hydrocephalus
Effects and Complications of Treatment
Vascular Lesions
AVMs
